Teacher : _____

Date : _____

Subtracting Fractions

1) $\frac{5}{10} - \frac{1}{3} =$

2) $\frac{2}{3} - \frac{1}{2} =$

3) $\frac{1}{2} - \frac{2}{4} =$

4) $\frac{4}{5} - \frac{4}{10} =$

5) $\frac{2}{3} - \frac{1}{10} =$

6) $\frac{3}{4} - \frac{1}{2} =$

7) $\frac{1}{3} - \frac{1}{5} =$

8) $\frac{7}{10} - \frac{2}{4} =$

9) $\frac{1}{2} - \frac{1}{3} =$

10) $\frac{2}{5} - \frac{1}{4} =$

Isn't this the same technique used in adding fractions?
